As we move from resiliency to transformation.

The barriers to college completion are complex and intertwined. No one educator, department, institution, or state can solve them alone. Complete College America's goal remains clear: for more Americans to earn college degrees and credentials of value that lead to upward social and economic mobility.

At the center of a network unafraid of complexity, we study the best ideas and co-design the most promising practices to bolster student success and increase college completion rates. We mobilize the boldest innovation at every level of higher education, translating innovative thinking into practical actions cross-sectional teams can implement.

In November, we will gather hundreds of education leaders in Baltimore for Next: The 2025 CCA Annual Convening. This is our opportunity to stand at the center of a network motivated by change—to move from resilient to transformative. Together, we will set the agenda for change, reframing challenges from complex problems to ambitious opportunities while sharing what we know, learning what we don't, and reimagining higher education as a force for transformation.

Will you help us drive this change?

By partnering with us as a sponsor for the 2025 CCA Annual Convening, you will support the creation and execution of ambitious change agendas designed to eliminate institutional performance gaps and increase college completion for students from underserved communities. Your support enables us to continue guiding cross-sectional teams through data-driven processes that prioritize, implement, and sustain meaningful change at every level.

Thank you for considering this opportunity to make a profound impact on students across the United States. Together, we can create a world where all learners graduate on time because the higher education system—every pathway, institution, and state—supports them.

Sincerely,

YOLANDA WATSON SPIVA, PH.D.
PRESIDENT
